EXCLUSIVE: Proof China, Russia Hacked 2020 Election: IP Addresses In China, Russia, Hong Kong, Germany, Canada, Czech Republic Hacked PA, NV, MI, GA Battleground States Raw Data Analytics Show

By Mary Fanning and Alan Jones | January 11, 2021

Raw data analytics exclusively obtained by The American Report show that during the 2020 presidential election internet protocol (IP) addresses in China, Russia, Hong Kong, Germany, Canada, and the Czech Republic hacked into IP addresses in the battleground states of Pennsylvania, Nevada, Michigan and Georgia.

IP addresses owned by Chinese telecom enterprise Huawei Cloud and Huawei's headquarters hacked into IP addresses of county election offices in Pennsylvania on November 3, 2020, the data analysis shows. A Huawei-owned IP address, Huawei Hong Kong Cloud, also hacked an IP address in Michigan.

IP addresses owned by Chinese state-owned telecommunications operator China Unicom also hacked into IP addresses of county election offices in Pennsylvania as well as an IP address owned by the office of the Pennsylvania Secretary of State on November 3.

IP addresses owned by Chinese internet provider ChinaNet hacked into IP addresses of county clerk offices in Nevada counties on November 3 and November 4, according to the data analysis. An IP address owned by ChinaNet hacked into an IP address owned by the Clark County Registrar of Voters on November 3. Las Vegas is located in Clark County.

Aliyun Computing Co. owns several IP addresses that hackede into IP addresses owned by four county clerk offices in Michigan on November 3, the data analysis shows. Alibaba Cloud, a subsidiary of Alibaba Group, is also known as Aliyun. Alibaba founder Jack Ma has not been seen in weeks.

An IP address owned by Kaspersky Lab - Moscow hacked into an IP address owned by the Leelanau County Clerk in Michigan on November 3, according to the data analysis. Kaspersky is a Russian software and cybersecurity firm. Kasperky Lab was co-founded by Eugene Kaspersky and his now-ex-wife, Natalya Kaspersky.

Eugene Kasperky, the CEO of Kaspersky Lab, served in the Soviet military intelligence service and is a graduate of The Technical Faculty of the KGB Higher School, now known as Institute of Cryptography, Telecommunications and Computer Science, part of the Federal Security Service of the Russian Federation, widely known as the FSB.

Natalya Kaspersky is now the CEO of Russia's InfoWatch Group and has a reported net worth of $270 million. "Natalya Kaspersky's Snoop-Proof Phone Helps Putin Thwart Spies," according to Bloomberg.

President Trump banned Kaspersky from all U.S. government networks when he signed the 2018 National Defense Authorization Act (NDAA). "The ban, included as part of a broader defense policy spending bill that Trump signed, reinforces a directive issued by the Trump administration in September that civilian agencies remove Kaspersky Lab software within 90 days," Reuters reported on December 12, 2017. "The law applies to both civilian and military

networks." U.S. District Court Judge for the U.S. District of the District of Columbia Colleen Kollar-Kotelly, former Presiding Judge of the U.S. Foreign Intelligence Surveillance Court (FISA Court), upheld President Trump's ban after Kaspersky labs sued the U.S. Department of Homeland Security.

"Christopher Krebs, a senior cyber security official at the Department of Homeland Security, told reporters that nearly all government agencies had fully removed Kaspersky products from their networks in compliance with the September order," according to the Reuters report. President Trump "terminated" Krebs in mid-November 2020 after Krebs claimed the 2020 election was the most secure election in history.

An IP address owned by the University of Stuttgart, a research university in Germany, also hacked into an IP address in Michigan on November 3, according to the analysis.
Amazon Data Services in Toronto, Canada owns an IP address that hacked into a Michigan IP address on November 3, according to the analysis. Dominion Voting Services is based in Toronto. Amazon Web Services (AWS) is a major provider of cloud services for U.S. elections.

IP addresses owned by Seznam, a search engine based in the Czech Republic, as well as an IP address owned by O2 Czech Republic, a Czech company offering mobile communications and internet access services, hacked into IP addresses owned by county clerk offices in Michigan on November 3, the analysis shows.

China's Shanghai UCloud Information Technology Company Limited owns an IP address that hacked into a Michigan IP address on November 3, according to the data analysis.

On November 4, 2020, Aliyun Computing Co. and ChinaNet, both based in China, hacked into an IP address in Georgia, according to the data analysis.
