Hi Amanda,

July 17, 2026

Wondered if you'd do a story on the vaccine settlement website that has existed for 11 years?

Senator Johnson has already abolished the press for not sharing the Covid story.

Sen Johnson Scolds Press For Not Covering The Vaccine News

A report from the U.S. Senate Permanent Subcommittee On Investigation Into Covid 19 is below.

Titled: Unmasked: How The Biden Health Officials Purposely Turned A Blind Eye Toward Covid-19 Vaccine Safety Signals.

Here are his witness transcripts and all the files he used.

They now call the vaccines, Countermeasures.

National Vaccine Injury Compensation Program | HRSA

The website offers settlements (guilty) for all vaccines that people were hurt by, or killed by, Covid included.

You can even include family members who were affected by a death.

I found their website is very complex to navigate but I have what people need on my website. Turns out you need just proof of vaccine, Immunization Card, Medical Records and if applicable a Death Certificate. You make out approx: 5 forms from their website.

As I said, their website seems complicated. It wants people to fill out the forms and send them in, and wait.

A lot of back and forth.

Themoreuknow.com - Vaccine Settlement

I've put the PDF Forms on my site, told people to fill them out, get Drs. Reports and vaccine cards and then call the Free Attorney.

Let them tell you if you have a case. Not the website. I also have all the vaccine information and PDF's from years of collecting, on my site.

Vaccine Injury Table Effective for Claims Filed on or After 1-3-2022

I've been pushing this among my family and friends and on my website.

I personally know one hurt so bad she is couch ridden and at least four deaths, by heart attack.

Stanford Medicine study shows why mRNA COVID-19 vaccine can cause myocarditis

Main cause of death from covid is: myocarditis

I have to laugh a bit when I see the search engine results. A small number of deaths?

That is inaccurate.

I'm writing in hopes that someone actually will do a real investigation into this.

Maine people should know about this. There is a deadline for filing.

United States Court of Federal Claims / Vaccine Attorneys

Also important, they get a FREE Attorney to settle their claim. Win Or Lose.

There are two in Maine, in Lewiston.

I hope you will check out my claims. All the links above, including mine, are safe.

Or... you can attempt the search engine results.

Thanks for listening.

Hi Amanda,

August 3, 2026

I'm sure I'm supposed to believe you get so many e-mails that this one wasn't seen. I don't. No coverage on the Fauci hearings tells me all that I already knew. The Media is complacent in covering up all about covid, as they always have been. "Reporters" as you call yourselves, do not exist anymore.

It's truly a sad day for the people in Maine. The same people you all call your followers.

The news still pushes the facts that you can be trusted. Your faces come up and because we "know" you, we go on believing you'd never hide important information from us, or even mis-lead us. When Obama appealed The Mundt-Act, the propaganda machine was allowed domestically, which was forbidden before that.

That's why the media is allowed to lie. But you probably know that.

Because even a good reporter would still question the most absurd stories they were being made to broadcast.

Masks? Social distancing? Hiding The cures? No one questioned any of that? No one in the news dept has kids?

What needs to happen is a lawsuit against the media for doing this. People died and not one mention of the vaccine settlement website for Mainers. The media money would beat a Mainer.. We're all aware of that.

Our only hope is Kari Lake, but even that seems highly unlikely.

Why this e-mail? I don't know...

Perhaps this reason, is the real reason people we trusted, like Cindy and Lee Nelson, retired.
